

What Is Site2Site?

Site2Site w/Acceleration

Site2Site Optimization

- Multi-Linked VPN Tunnels
- Aggregated Link Speeds
- Faster Office to Office Connectivity
- Highly Resilient Connectivity
- Spoke & Hub or Fully Meshed
- Unique Technology from XRoads Networks

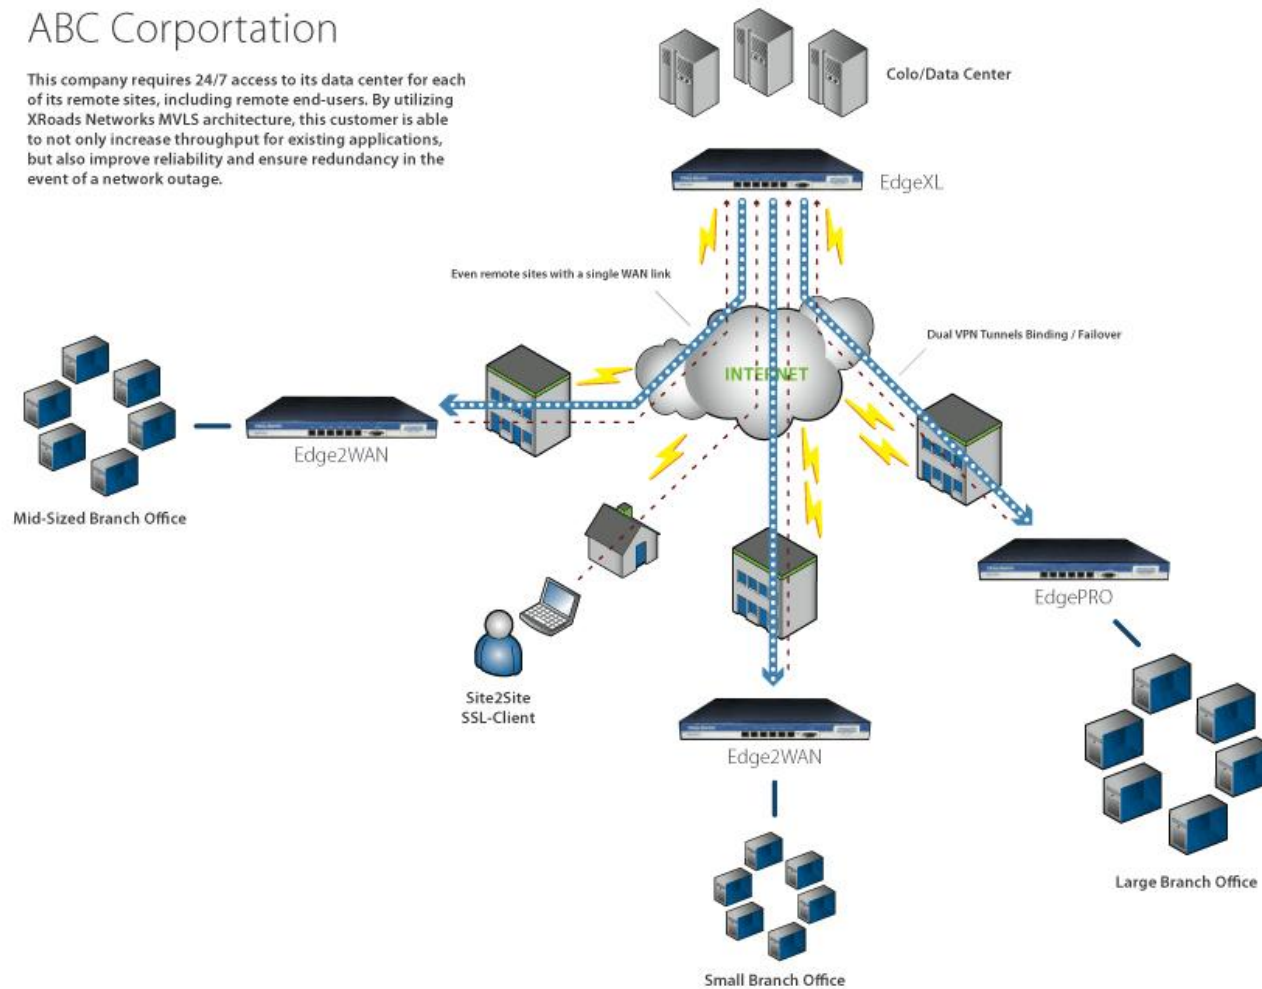

Architecture

Topology

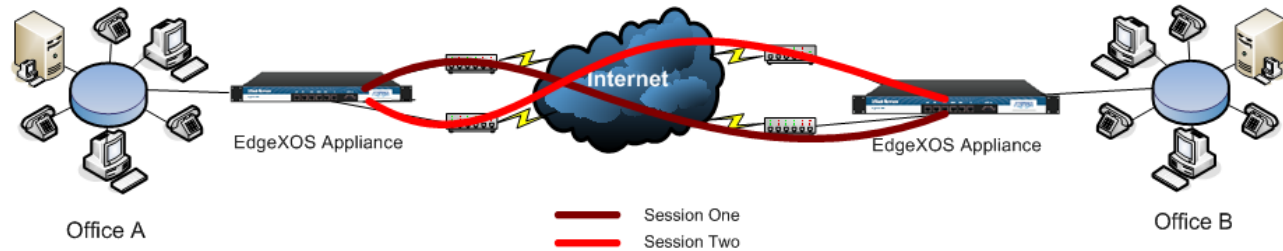

ABC Corporation

This company requires 24/7 access to its data center for each of its remote sites, including remote end-users. By utilizing XRoads Networks MVLS architecture, this customer is able to not only increase throughput for existing applications, but also improve reliability and ensure redundancy in the event of a network outage.

RESULTS

Aggregated Links
w/Built-in Compression
Deliver Faster Site-to-
Site Connectivity.

Fully Meshed Tunnels
Ensure Maximum
Uptime in the Event
of a Network Link
Outage.
